- Living materials
- Culture media
- Frozen materials
- Preserved materials
- Skeletons
- Microscopes
- Wall charts
- Data Logging
- Stains and Indicators
- Seeds
- Books
- CD-ROMs
- Videos

*and lots more in our full
colour catalogue*

Cockroaches

NOTES ON MAINTENANCE OF COCKROACHES

- Cockroaches can be kept in a secure container with ventilation holes.
- Sawdust on base of container
- Folded cardboard in container gives the cockroaches somewhere to hide - they like darkness.
- At Southern Biological we feed the cockroaches on rat pellets only and include a bird feeder with water. N.B. place paper towel or cottonwool in feeder so they can get moisture and not drown.
- Place container in a warm, ventilated room.
- Check container every two weeks and top up food and water.
- Cleaning the container is not essential.
